

Rising Above: The Science of Sea Level Rise and What it Means for Us

Ocean Life Series

The science is clear: sea level is rising. The extent to which we are able to create opportunities from this challenge for our communities is how well we incorporate understanding of anticipated impacts into decision making and think outside the box to realize those opportunities. This requires broad collaboration and strong partnerships across academia, business, residential, and tourist communities, and government to develop innovative solutions and train the next generation of solution makers. In this presentation, we'll hear about science, impacts and work toward solutions concerning sea level rise in South Florida.

Featuring
Tiffany G. Troxler, Ph.D.
Director, Sea Level Solutions
Center
Florida International University

Friday, May. 20, 2016
6:00 p.m. - Meet and Greet
7:00 p.m. - Lecture

Murray E. Nelson Government and Cultural Center
102050 Overseas Hwy. - MM102
Key Largo, FL 33037

This event is free and open to the public.
