The School of Environment, Arts and Society is hosting a number of lecture series during the Spring 2012 semester. The **Environmental Film Series** features four documentaries, each with a theme closely connected to SEAS. The series will consist of film screenings followed by brief expert talks and Q&A sessions. The **Department Lecture Series** highlights a few of the many exciting lectures being hosted by SEAS departments next semester. The **Eat, Think, and Be Merry Science Cafe** held at Luna Star Cafe in North Miami, gives students and the community the opportunity to discuss timely scientific issues with researchers in a relaxed conversational setting. Finally, the **Ocean Life Lecture Series** will be held at the Murray E. Nelson Cultural Center in Key Largo. The series will feature FIU researchers discussing marine issues in the Keys. For more information on these and other SEAS’ events, please visit seas.fiu.edu.
